

## wood doorknob 2 by Maich Swift Architects

**izé**

### MSAK02

Part of a set that includes matching doorknob and coat hook. The manufacture employs readily available, small pieces of wood from coppicing and fallen trees using UK sourced timber from broadleaves such as Beech, Ash, Oak, Yew and London Plane. The cabinet handle is durable, smooth and tactile. Natural, hard-wearing finishes are used to seal the wood and will develop a patina through use.
