

flamingo toilet roll holder by Make Architects

izé

MKA04

Architect-designed luxury toilet roll holder
London-based architect Make collaborated with izé on designing ironmongery for its project at 55 Baker Street, London. The Flamingo hardware picked up on the micro-scale the faceted glazed insertion to create a new lobby and atrium that the architect used to give a new life to the building. The toilet roll holder follows the design of the rest of the Flamingo range, which reflects and refracts the angular planes of the architecture. Like all izé luxury ironmongery, the toilet roll holder is available in the full range of izé materials.

Length : 210 mm

Projection : 97 mm

Finish : Available in all izé finishes
